Skills

- **Languages**: C++, Java, Kotlin, Python
- **Frameworks**: HTML and CSS
- **Tools/Platforms**: Github, Jira, Eclipse, Android Studio
- **Soft Skills**: Problem-Solving Skill, Leadership, Project Management, Adaptability

Projects

- **Science Experiment Advisor** Mar'25-Apr'25
- Developed a Science Experiment Advisor Platform using HTML, CSS, JavaScript, and Node.js to help users get experiment suggestions based on topics and difficulty levels.
- Implemented interactive UI and real-time recommendation logic, improving user engagement and usability
- Built a Node.js backend with APIs for experiment retrieval, user input processing, and dynamic content generation.
- Ensured responsive design, clean code structure, and smooth client-server communication using modular JavaScript and Express.js

- **Hotel Management System** Jun'25

- Developed a C++-based Hotel Management System featuring room booking, check-out, stay extension, and real-time availability tracking.

- Implemented date handling, billing calculation, and conflict-free reservation logic using structured data and algorithms.

- Designed reports for occupancy and revenue, improving operational visibility and decision-making.

- Applied clean modular design principles with vectors, structures, and validation logic for efficient data management.

Summer Training

Data Structure and Algorithm

- Implemented efficient algorithms using data structures to solve computational problems and optimize time complexity.
- Collaborated in project-based learning, applying theoretical knowledge of Data Structures and Algorithms to real-world scenarios, including building a comprehensive Library Management System in C++.

Certificates

- Social Network | NPTEL Apr'25
- Introduction Hardware and Operating Systems | Coursera Sept'24

Achievements

- Solved 100+ DSA problems across platforms like Leetcode,Codeforce and strengthening problem-solving.
